Table of Contents

**Metabolic Therapies in Orthopedics, Second Edition**

Edited by Ingrid Kohlstadt MD, MPH and Kenneth Cintron, MD, MBA

**Front Matter**

**Section I. Cross-cutting Technologies**

- Chapter 1. Regenerative orthopedics enabled by cross-cutting technologies  
  Kenneth Cintron, MD, MBA
- Chapter 2. Orthogenomics: Genome-directed therapies in orthopedics  
  Joseph R. Veltmann, PhD, DCCN and Roberta L. Kline, MD
- Chapter 3. Predictive biomarkers in personalized laboratory diagnoses and best practices outcome monitoring for musculoskeletal health  
  Russell Jaffe, MD, PhD, CCN and Jayashree Mani, MS, CCN
- Chapter 4. Veterinary medicine’s advances in regenerative orthopedics  
  Sophie H. Bogers, BVSc, MVSc, PhD and Jennifer G. Barrett, DVM, PhD
- Chapter 5. Biotensegrity: How ultrasound diagnostics guide regenerative orthopedic therapies to restore biomechanical function  
  Bradley D. Fullerton, MD
- Chapter 6. Photobiomodulation therapy in orthopedics: Metabolic effects  
  Michael R. Hamblin, PhD

**Section II. Clinical Approaches to Preventing and Treating Metabolic Dysfunction**

- Chapter 7. Safe-guarding the musculoskeletal system from food technology’s untoward metabolic effects  
  Ingrid Kohlstadt, MD, MPH
- Chapter 8. Inflammatory responses acquired following environmental exposures are involved in pathogenesis of musculoskeletal pain
Ritchie Shoemaker, MD and James C. Ryan, PhD

Chapter 9. Periodontal disease: Treatable, nutrition-related and with systemic repercussions
David Kennedy, DDS

Chapter 10. Reduction in orthopedic conditions through treatment of pharyngorofacial disorders
Joseph Yousefian, DMD, MS and Michael N. Brown, DC, MD

Chapter 11. Medication-related muscular pain
Sahar Swidan, PharmD

Chapter 12. Metabolic interventions for obesogenic sarcopenia
Gabrielle Lyon, DO and Jamie I. Baum, PhD

Chapter 13. Drug-related sarcopenia
Sahar Swidan, PharmD

Chapter 14. Sex hormones and their impact on sarcopenia and osteoporosis
Pamela W. Smith, MD, MPH, MS

Chapter 15. Treating the dysmetabolism underlying osteoporosis
Xaviour Walker, MD, MPH, DTMH and Joseph Lamb, MD

Chapter 16. Nutritional status and interventions for reducing stress fractures among military personnel
James McClung, PhD

Section III. Metabolic Therapies for Specific Orthopedic Conditions

Chapter 17. Perioperative metabolic therapies in orthopedics
Frederick T. Sutter, MD, MBA

Chapter 18. Metabolic therapies for muscle injury
Ana V. Cintrón, MD and Kenneth Cintron, MD, MBA

Chapter 19. Tendinopathy: Addressing the chronic pain and pathophysiology
David Musnick, MD

Chapter 20. Metabolic therapies in the management of heel pain

Emily M. Splichal, DPM, MS

Chapter 21. Fascial syndromes: Emerging, treatable contributors to musculoskeletal pain

David Lesondak, BCSI, KMI, SST, LMT

Chapter 22. Metabolic approaches to the treatment of back pain

Carrie Diulus, MD, and Patrick Hanaway, MD

Chapter 23. Optimizing metabolism to treat fractures and prevent nonunion

Jacob Wilson, MD; Scott Boden, MD; Kenneth Cintron, MD, MBA; and Mara Schenker, MD

Chapter 24. Treating the underlying causes of synovitis, degenerative joint disease and osteoarthritis in primary care

John Cline, MD, BSc

Chapter 25. Osteoarthritis: Comprehensive treatment

David Musnick, MD and Richard D. Batson, ND

Chapter 26. Integrative approaches to autoimmune arthritis

George E. Muñoz, MD
